Block Out Access Lock In Savings

PANDUIT *offers innovative security devices that safeguard your network connections by blocking unauthorized access, saving you time and money.*

PATENT PENDING

RJ45 Plug Lock-In Device – secures a plug into a jack to prevent unauthorized removal of a patch cord, VoIP phone, or other network equipment

RJ45 Jack Blockout Device – blocks unauthorized access to jacks and resists tampering

Both devices offer:

- Compatibility with most RJ45 patch cords and jacks, accommodating new and existing installations
- A compact design for use in high-density applications without interference
- An installation and removal tool to ensure greater physical security
- Availability in six colors for improved visual identification
